

شركة الألمانية لتصنيع مجاري الهواء
German Duct Manufacturer Co.

G D M FLEXIBLE PVC

Produced for use in heating, cooling, ventilation systems, waste gas transmission lines, and especially in industrial areas and systems involving transmission of various particles.

- Reinforced with 300 denier polyester fabric and made of PVC and high-tensile steel wire.
- Intended for medium and low pressure environment.
- Resistant to physical impacts and tear.
- Airtight.
- Flame retardant.
- Produced of antistatic material preventing the adhesion of particles.
- It has the features of being able to be stretched, twisted and compressed.
- Produced in accordance with ISO 9001-2008 Quality Management System.
- Complies with TS EN 13180 standards.

Technical Specifications :

| | |
|--------------------------------|----------------------------------------------------|
| Material | : PVC reinforced with 300 denier polyester fabric. |
| Diameter Range | : \varnothing 52 mm - \varnothing 610 mm |
| Heat Resistance | : -30 °C + 80 °C |
| Velocity of Air Flow | : Max. 30 m/sec |
| Operating Pressure | : Max. 10.000 Pa. |
| Class | : Flame Retardant |
| Standard Form of Supply | : Box / 10 m |
