

SPIRAL DUCT and FITTING

We ensure to fabricate our entire range in tandem with the set industry norms, so that energy efficient. Widely demanded in numerous industries, these spiral ducts find application in warm and cold air , fume and dust extraction and pneumatic conveying.

Product Details:

Thickness	0. 50mm (26g) to 1.25mm (18g)
Diameter	100 mm to 1600mm
Material	Galvanized steel, aluminum, mild steel, (CRCA), stainless steel, etc
Colour	Silver
Temperature Range	-30C to +150C
Type	Fixed
Product type	Spiral Ducts
Application	Industrial

Advantages:

Energy efficient, cost less to install, requires less space, Need less hangers, Operation cost lower
Installation simplified, Cleaning less complicated, Airflow measurement easier, Light in weight

Applications:

Air conditioning (including high pressure and high velocity air distribution systems)
Ventilation (industrial & tunnel) ,Warm air heating , Fume and dust extraction
Pneumatic conveying ,Exhaust and air intake pipes ,Humidification

Duct Fittings

[Elbow, Reducers, End caps, Offsets, etc.,] with standing seam are manufactured on high speed and high accuracy machines like CNC Plasma Cutter, Gore Locker, Button Locker, Roll Former Stitch Welder etc.
